

# You Can Do It

FOLLOW THE SIMPLE PROCESS BELOW

Fishbone braids? Beautiful Bangs? You're in control. **Experience Ultima the breakthrough hair made from natural organic protein.** Curls instantly, restores like new with water misting. Extremely easy to manage hair, tangles less, hypo-allergenic, always clean & fresh for sensitive scalps.

## Steps & tools used in creating style A

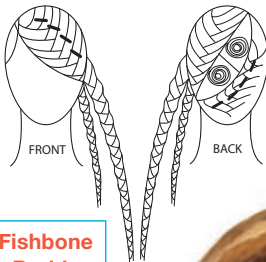

**Gather the hair** from the right side to the left and divide into 3 sections diagonally.

**Attach 4 pink** accent clips along the top, (parallel with your hairline) incorporate them with your natural hair and make a loose fishbone braid towards the left side. Add a Pink Accent clip near the end of the braid then finish braid.

**Attach 4 clips** to the bottom section of hair and gather into a loose fishbone braid.

**With the remaining hair** in the center, make two buns side by side and put a Pony-do on each.

Twist and wrap half of the Pony-do onto each bun and secure with a pin.

A

## Steps & tools used in creating style B

**Prep hair** for the French roll by making big curls then brush the top hair to the back and part down the middle.

**Starting** on the left side brush two inches to the left, spritz down then use bobby pins to hold in place. Do the same to the right side.

**Take two** pieces of the black braiding hair, tease and spritz them into two oblong rolls. Both of these pieces are stuffing for the French rolls. Securely pin them down with bobby pins. Take the loose hair and smooth neatly over the stuffing with the rat tail comb starting from the bottom then, working your way up as you tuck and pin. Do this on both sides.

**Once** the hair is in place and smooth use hair spray for holding.

**With** the front hair as a French roll attach the clip-on bang, cut and style the clip on bang as desired then mold and pin the back of the bang into the French roll. Pin the white braiding hair on top of the bang.
